Provincial Election to be Held Thursday, June 19

A provincial general election will be held in Alberta on Thursday, June 19, as announced on Thursday of last week.

With the announcement of the election, the sixth Legislature of Alberta will be dissolved following its fourth session.

In making his announcement Premier Brownlee said:

"In keeping with its promise during the recent session, that if an election were to be held this summer, ample notice would be given, the government today (April 24) announces its decision to hold an election this summer with polling day fixed for June 19.

"The Government confidently believes the agreement for the transfer to the province of its natural resources will be ratified at the present session of the Dominion House. This agreement, following the completion of the sale of the Northern railways, brings to a close the last of the major problems facing the province in the last nine years.

"In selecting the personnel and determining the policy of the administration of the natural resources, a new set of problems of no less importance faces the province for the next few years. From an administrative viewpoint therefore, this year marks the close of one and the beginning of another area, and is an appropriate time for an appeal to the people. The people are entitled to say what government they wish to entrust with the responsibility of administering the natural resources, and in order to allow the administration an undisturbed term in assuming this task, considers it advisable that an election be held at once."

His Honor the Lieutenant Governor will dissolve the Legislature this week.

Then will come the issuing of the writs for the election, which, according to statute, must be done within a minimum of 20 days, and provides for 30 days before nomination day, which in turn must be 10 days before polling day.

In this case the Government is giving more notice than required, and is giving 58 days, which is approximately the same length of time as is required for a dominion election, which is 60 days.

In 1926 the election was held on June 28, just nine days later than the date set for the coming election.

Few, if any, doubt the return of the Brownlee Government. It has been efficient and has not been involved in scandal. It will have the solid support of the farmer and will also elect some of the cabinet ministers in the city.

The Farmer party came into power in 1921. Hon. Herbert Greenfield was the first premier. In 1925 he retired in favor of Hon. J. E. Brownlee, then attorney general, who appealed to the people a year later and was successful.

The standing of the parties in the last House follows: United Farmers 43, Liberals 7, Labor 6, Conservatives 4. After selecting a speaker the government party had a majority of 25 over the other three groups combined.

The United Farmers of this constituency will hold their nominating convention at Cereal on Wednesday, May 21. Lorne Proudfoot is the sitting member and his friends expect he will

Another Local Ratepayer Against Hospital Scheme

Collingwood, April 28, 1930.

Editor The Advance:

Permit me a few lines in regard to a ratepayer's letter in your last week's paper re the proposed Youngstown hospital scheme.

I quite agree with the letter, and would suggest that all U.F.A. Locals take this question up at their meetings and discuss it intelligently as to whether we really need this hospital or not.

Thanking you in advance for valuable space in your worthy paper.

RATEPAYER.

Closed Wednesdays at 1

By mutual consent the retail merchants of Chinook will close their places of business at 1 p.m. every Wednesday, beginning on May 7, for the summer. Kindly bear this in mind.

Our Opinion of the "Times"

Article No. 2

Alberta beef cattle on several occasions have topped the Chicago market. Sugar beats are being grown to great advantage in Southern Alberta tributary to a large sugar factory. Honey production is a new, prosperous and growing industry.

In Turner Valley in 1929 nearly 1,000,000 barrels of high grade, high test oil were produced, and this will be exceeded in 1930. One Canadian and one American syndicate are awaiting the consent of the Federal Government before they start the expenditure of millions in developing the tar sands of Fort McMurray district. This great resource of Alberta is destined to become an important factor in the commercial development of the West. Alberta's coal deposits are estimated at 14 per cent of the world's known coal reserves. None of these things have been affected by the stock market crash of last fall. These resources—these potentialities are still as rich and as valuable, and as available for our use as before.

In Calgary the Bank of Montreal are putting up a new \$700,000 building just opposite the new million dollar addition made by the Hudson Bay Co. The Bank of Nova Scotia are just finishing a new half million dollar structure. The new post office is well under way. The Foundation Company will soon start on a 10 storey office building. The Prudential Dental and Medical building of 12 storeys, and costing in the neighborhood of \$850,000, will be built this year. The York Hotel has just been opened and the Wales Hotel is starting construction. Countless smaller structures are to be built this year. Does this mean lack of confidence in our immediate future. How does these expressions of optimism in our future measure up with your own? And remember, you pessimists, that the above figures are the concrete opinions of some of Canada's most conservative companies, who wouldn't gamble a plugged dime on an uncertain issue.

Laugh that off.

again be the Farmers' standard bearer, but anything might happen at a political convention. Both the old political parties have new leaders, and if either have a camp in the Acadia constituency they have been very quiet.

Cause For National Gratification

Profound satisfaction will be felt by the people of Western Canada, in common with the rest of the world, in the successful outcome of the Five Power naval conference in London, England. That satisfaction is all the greater, and the feeling of relief more pronounced, because of the many predictions freely made during the progress of the conference that its results would be nil, and quite abortive in the realization of the hopes in which it was conceived.

Because there were many conflicting viewpoints to be reconciled, many difficulties to be overcome, and the conference ran on month after month, the pessimists told an anxiously awaiting world that nothing would be accomplished because nothing could be; that the nations were still so suspicious of each other that they were afraid to disarm in even the slightest degree; that the old game was still being played with each nation trying to get some advantage at the expense of others.

But with the signing of an agreement by the three greatest naval powers, and acceptance of a portion of the agreement by the next two naval powers, the dire prophecies of the pessimists have been proven foundationless. Instead, the splendid optimism, the unflinching patience and courage of Ramsay MacDonald have triumphed, and a great forward step taken along the road to permanent world peace.

After a world war lasting more than four years, why should people have become discouraged and given failure because a period of three months was required in discussion of the many knotty problems confronting the naval conference before a solution was found?

The British Commonwealth of Nations, the United States of America, and the Empire of Japan have found themselves whereby they undertake to reduce their naval armament and expenditures and voluntarily impose restrictions on themselves. The number, size and armament of ships of war is limited. And who, a few short years ago would have imagined it possible, all five powers agree that information will be given to each by all the others "of vessels it is building" in replacement of obsolete, abandoned and destroyed ships. This is not preparation for war, but for the maintenance of peace.

But the great achievement of the conference is not to be found so much in the actual reductions decided upon, or the limitations of actions voluntarily assumed, as it is in the established fact that the policy of friendly consultation between nations has been given an impetus which will undoubtedly grow. This more than anything else must fill the world with hope for the future.

The conference has also established beyond all possibility of dispute that, no matter how far the leaders of a nation may be prepared to go in the matter of disarmament, they can only proceed as far as public opinion at home will support them in going. The belief is general that the conference would have gone to even greater lengths in disarmament had the various representatives there felt assured of support at home, and that their very willingness to make concessions would not be used to overthrow the whole project when referred for final ratification by their national assemblies.

The great lesson of the conference for all peace-loving people is, therefore, the vital necessity of an awakened and informed public opinion in every land on the awful subject of war and preparation for war, rather than preparation for peace. Once again has it been demonstrated by this naval conference that information will be given to each by all the others "of vessels it is building" in replacement of obsolete, abandoned and destroyed ships. This is not preparation for war, but for the maintenance of peace.

It is the rank and file, the great mass of the people who must become peace-minded. It is the masses who must be informed and taught to shed their suspicions and animosities. The more ardent advocates of peace the peoples of all nations become, the more quickly will their recognized leaders and responsible statesmen write those wishes into solemn agreements and binding treaties.

Canadians, perhaps more than any other people in the world, have cause for thankfulness and rejoicing in the reaching of a naval understanding between the British Commonwealth, the United States and Japan. We are part and parcel of the British Commonwealth, while our nearest neighbors are the United States and Japan. With the former we have much in common, while with the latter by reason of our geographical position we must have ever increasing intercourse. Furthermore, any misunderstanding between the United States and Japan could hardly fail to react with injury to us. That all are in accord is cause for deep gratification in Canada.

Should Finish Studies In Canadian University

British Students Who Settle Here
Would Find It Helpful

British students who wish to settle in Canada should complete their studies in Canadian universities. This is the conclusion arrived at by Dr. Cyril Norwood, headmaster of Harrow, and chief of the party of headmasters of British public schools who are now touring Canada.

Dr. Norwood has based his conclusions on a study of the Canadian universities the party visited at Quebec and the Maritimes. He hoped the future would see more Canadian students at Oxford, Cambridge and London, but felt the most important requisite for success in Canada was training in a Canadian university. There was a movement on foot, he said, to make the University of London the research centre of the empire.

Iceland's foreign trade is increasing.

Queer Insects In Peru

Certain Type Of Ant Is Used In
Surgical Way

There are surgical ant martyrs in Peru. Advice from an expedition of the Field Museum tells that when a native of the equatorial forest is wounded, he gets a certain type of ant with powerful jaws. The ant is made to bite severed edges of skin and bring them together. The surgeon loses his life in healing.

After he bites his body is snipped off and his head with its death grip on the skin remains till the wound is healed.

Heal the Sprain with Minard's.

Africa Has Aerial Studio

Plane Was Especially Built For
Mapping Country

Built especially for the photographing of an area of 63,000 square miles in Northern Rhodesia, an airplane is soon to be put into commission. The machine is literally an aerial photographic studio. It can be flown at a height of 20,000 feet and remain at this altitude for seven and one-half hours, while the pilot and photographer map the country below. As most of the flights will be over a wild country the plane has two engines so that if one fails the other will carry the machine to safety.

German scientists have succeeded in obtaining electric current from storm clouds in a Swiss mountain and controlling the sparks produced.

Discovery Of Danish Farmers

Sale Of Milk By The Foot Is a
Possibility

Milk will shortly be on sale by the foot, following important experiments at a Danish farm.

It has been found that when the natural water is withdrawn from cows' milk the remaining pulpy substance can be rolled into sheets similar in appearance to paper.

Special machines have been made to carry out this rolling process on sanitary lines, and the milk becomes so highly concentrated that it is a food in itself.

When required in liquid form it is simply dissolved in boiling water and its strength gauged by the amount of water added.

OWES HER HEALTH TO PINK PILLS

This Weak Anaemic Woman
Now Rejoices In Health
and Strength

It is a scientific fact that nearly all the ills that afflict women are due to poor, thin blood. This anemia is the one cause of low spirits and languidness, the poor appetite, breathlessness and aching backs that make life a burden. But women could banish all these miseries by taking Dr. Williams' Pink Pills, for it is a known fact that these pills create an abundance of new rich blood — their wonderful reputation is based on that. Proof of these statements is given by Mrs. L. Deschenes, La Tuque, Que., who says: "Before I began using Dr. Williams' Pink Pills I was in a badly run down condition. I appeared to be almost bloodless, had frequent headaches, and the least exertion would leave me breathless and worn out. My husband advised me to try Dr. Williams' Pink Pills and got me six boxes. Almost from the first I noticed an improvement in my condition, and as I continued taking the pills my blood became better and I steadily grew stronger. I'll today I am enjoying the best of health. I am now able to do all my housework without feeling the least fatigue; my appetite is better and I sleep more soundly at night. All this I owe to Dr. Williams' Pink Pills, and I unhesitatingly recommend them to all who are run-down in health."

You can get Dr. Williams' Pink Pills at all drug stores or they will be sent by mail at 50 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

Canada Has Exclusive Method Quality Of Canned Goods Must Be Marked On Label

Canada is the only country in the world so far to require the quality of canned goods to be clearly marked on the label so that the housewife can buy with the assurance that she is getting what she wants. Under the provisions of the Meat and Canned Foods Act, administered by the Fruit Branch of the Dominion Department of Agriculture, there are four quality grades: "Fancy," "Choice," "Standard" and "Second." "Always buy by the quality mark" is a slogan can now be applied to home buying with a real value.

Persian Balm is unrivaled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for charm and elegance.

Canada's Forest Area

The total forest area of Canada is estimated to be 1,151,454 square miles. Of this area, 865,880 square miles are productive and accessible; a little over one third of this area bears timber of merchantable size; the remainder carries young growth not yet fit for use.

A railroad in Japan provides third class sleeping cars for its poorer patrons.

Do Your Ears Buzz With Loud Noises?

This in an infallible sign of Catarrh, and if not checked may result in partial deafness. The remedy is CATARRHOZONE — inhaled its soothing vapor a few times daily, and it prevents Catarrh from spreading. Head noises, buzzing and ringing in the ears are soon corrected by CATARRHOZONE. Nasty nose-discharges are stopped. Sore, inflamed crusts are healed. Sickening mucous which drops back from the nose to the stomach is done away with. Headaches depart. The breath is purified. You will be free from colds, coughs, sore throat and catarrh if you use CATARRHOZONE. Two months' treatment \$1.00; small size, 50c. At all dealers.

Boosting For Canada

Many Cities In Britain Have Held
"Canada Week"

There has not been much said in Canadian newspapers about the city of Bristol's "Canada Week," and the event should have been taken more notice of than it was.

Glasgow, with a population of over a city of 400,000 people. It has just had a "Canada Week," which consisted of a campaign for the buying of goods made in Canada. Pages of newspaper advertising space, posters, window displays of Canadian merchandise, and other forms of publicity were given to our products, and the cumulative results must have meant the selling of many thousands of dollars worth of goods, besides the value of introducing lines of Canadian goods to Bristol purchasers for the first time.

Glasgow, with a population of over a million, and several other big cities, have held "Canada Weeks," and Canada must have derived a large amount of permanent benefit from them.

Such gestures of good-will deserve the practical approval of Canadians. There is a great deal more boosting of Dominion products in Great Britain than there is of English products over here. The Empire Marketing Board spends about \$5,000,000 on the promotion of the sale of Empire goods in the British Isles. We have a vast quantity of merchandise over there, and then spend most of our money in buying United States goods.

Canada will wait till the moon turns into cheese before a "Canada Week" is staged in one of the big cities over the border.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all, because they are British Isles. There is a vast quantity of merchandise over there, and then spend most of our money in buying United States goods.

Has No Known Parallel

Two British Families Have Produced
Outstanding Men For Generations

The death of the Earl of Balfour recalls the fact that for centuries two British families have produced big men for generation after generation — the Cecils and the Churchills. There is no known parallel for this in any other land or in any other age.

The Pitts, father and son, were premiers of Great Britain but it ended there, and of practically all other men of note in the old land the descendants have not attained any other honor save that of carrying a big name.

If it be true that the mother transmits mentality, then the Cecil and Churchill men must have an uncanny habit of selecting unusual wives.

Established a Record

Thirty-two years on a water wagon is a record of civic service which will take some beating, and when there is added to that a service of over 25 years, as driver of the town's fire team, during which he missed only one fire, and the record of John Tozer of Port Hope, Ont., seems to be complete.

Chicken Cannery

The construction of a \$25,000 chicken cannery to be operated in connection with the B.C. Egg Pool and with other poultry raising concerns of the Fraser Valley, is planned for New Westminster. It will be a private venture.

One of the most thrilling drives in the mountains of Western Canada is along the new motor road to the top of Mount Revelstoke, in Mount Revelstoke National Park, a reservation of 100 square miles in British Columbia.

The polar bear has hair on the soles of his feet, which helps it to avoid skidding on the ice.

Minard's Checks Falling Hair.

Millions Dedicated

To Humanity's Service

Huge Sum Set Aside By Mayo Bros.
For Medical Education and
Research

The millions of dollars that Doctors William and Charles Mayo have made through their world-famous clinic at Rochester, Minn., will not go to their families when the two great surgeons die.

Instead this money — the "holy money," as the brothers call it, now totalling in the neighborhood of \$13,000,000 — will be dedicated to humanity's service through the Mayo Foundation for Medical Education and Research, affiliated with the University of Minnesota.

Meanwhile the two brothers have put themselves on "salaries" which do not amount annually to nearly half their incomes. All of their incomes above these salaries goes to the foundation, to train surgeons for the future.

Dr. William Mayo was asked on what basis he and his brother have fixed their charges.

"That, too, was something my brother and I discussed long," he said. "When money began to come in and pile up so fast it frightened us, we had to meet that problem. The thought of reducing fees generally had to be dismissed. We could not pauperize our own profession. There are thousands of physicians and surgeons who need the income from what are becoming accepted as standard fees."

"But we could do something that we did. We scaled the fee in accordance with the patient's means. And we gave the same treatment to the man without a cent that we gave to the millionaire. A man's financial standing has nothing to do with the treatment he gets from us. But it has everything to do with what we charge him."

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and relieves it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever required for.

Curious Twist Of History

Anyone with an eye for the curious twists of history must be interested in the fact that Primo De Rivera, ex-dictator of Spain, was kept alive for many years past by insulin, developed in the New World, which was discovered by a man financed by the Spanish Court, nearly four and a half centuries ago.

It is estimated that there are 200,000 drug addicts in the United States.

The star-fish has no nose, but the whorls of its underside is endowed with the sense of smell.

Major Developments In Canada's Air Mail Service Attracting Great Attention

Canada, with her vast area and widely scattered population, is advantageously situated to derive the greatest benefits from the development of internal air mail service. The great distances which separate the principal urban centres and the steady and broad-fronted advance in settlement and development serve to render postal communication by air pecuniarily valuable in the Dominion. In addition, the Post Office Department of Canada has entered into a reciprocal arrangement with the United States postal authorities whereby Canada may take full advantage of the extensive United States air mail services connecting with points in Mexico, the West Indies, and Central and South America.

The establishment of Canada's official air post services is of comparatively recent date, but the conveyance of mail matter by air within Canada has been an actual fact for over ten years. In the early days of mail transportation by air, the Post Office Department, as a temporary measure, gave permission to the operating aviation companies to carry letters, entirely at the sender's risk and subject to a small fee ranging from five cents to twenty-five cents per letter, in addition to the regular postage. This fee was retained by the operating company. The successful operation of numerous "sticker" services demonstrated beyond question the essential practicability of air mail transport in the Dominions, for these services were conducted in many cases under considerable operating difficulties although not on hard-and-fast schedules.

Civil aviation in Canada assumed proportions in 1927 which justified the Post Office Department in utilizing the facilities available for the fast transport of mails, not only to remote areas but between the centres of population. Services of the latter type had of course to be arranged on definite time schedules and this involved a much greater problem. As a beginning, a service was inaugurated by which incoming British mails were taken from transatlantic steamers and transported by air to Montreal, this considerably hastening their delivery. Later, on October 1, 1928, a service of daily frequency was established between Montreal and Toronto, and on the same day an international air mail route was opened between Montreal, P.Q., and Albany, N.Y. On July 15, 1929, the Montreal-Toronto route was extended to Detroit, via Hamilton, London, and Windsor, Ontario, and thus a point of contact with the United States air mail routes westward was established, in addition to providing the most densely populated portion of Ontario with speedy air mail service. On the same date a still further connection with southern air mail routes was provided by the establishment of daily service between Toronto and Buffalo. Notwithstanding the difficulties of operation in the Maritime Provinces—scarcity of suitable landing fields, densely wooded areas, broken country, and fog—the Postmaster-General inaugurated a service early in December, 1929, between Montreal, Quebec, Moncton, and Saint John.

The next major development in Canadian Air Mail Service was the inauguration of the trans-prairie route on March 3, 1930. Planes are now operating daily between Winnipeg, Regina, Moose Jaw, Medicine Hat, and Calgary, and between Regina, Saskatoon, North Battleford, and Edmonton on a schedule which clips a full twenty-four hours off the transcontinental movement of Canadian mails. This not only constitutes a marked advance towards the coast-to-coast service which is being developed link by link, but revolutionizes intercommunication between the provinces of Alberta, Saskatchewan, and Manitoba.

It is in the outlying portions of the

"What had taste. One does not wear yellow trousers with a morning coat."—Hummel, Hamburg.

W. N. U. 1835

Still In Experimental Stage

Difficulties Have Cropped Up In Connection With Battery Brooders

A recent report of the Dominion Experimental Farm would indicate that another much heralded innovation in the poultry industry is not destined to any great success. During the past two or three years, the battery system of brooding chickens has gained some prominence in Canada, the principle being that of raising chickens in a uniformity and correctly heated room in metal bathtubs. These bathtubs are simply crates, placed one on top of the other with a wire floor and equipped with troughs for water and feed. Beneath the wire floor are papers to catch the droppings and which are easily removed and burned.

The advantages of such a system are quite obvious, it is really a factory of mass production of chickens. One man can look after a large number of the babies and the wire floors make for complete sanitation. Temperature and fire risks are eliminated, spread of disease is minimized, and the feed and water troughs, which are placed outside the wire walls of the compartment, are easily kept clean.

But some difficulties have cropped up and it would seem from the report that they are serious ones. In the first place, a temperature that suits day-old chicks is too high for the older broilers. Some considerable trouble has developed from chicks getting caught in the wire floors as might be supposed, and last, but not least, it was found that from four to six weeks is the oldest that chicks can be handled in this manner. Camellian and nervousness then develops in the chicks, and the mortality becomes high.

The report concludes that the battery system is still in the experimental stage and that at present will find its greatest use under hatchery conditions for the short time holding of chicks.

Willing To Take Chance

Norman Derham, who swam the English Channel in 1926, has written to Knute Johansson, a young Scandinavian, who proposes to cross the Atlantic in a speed boat, offering him his services as a companion, for whom Johansson has been advertising.

Colorado Interested In World Grain Exhibition

Farmers Of Peetz District Plan To Enter Exhibit

According to the Peetz Gazette, a weekly newspaper published at the town of Peetz, Colorado, the farmers of that district are determined to demonstrate their ability to grow the best quality grain, states S. J. Latta, publicity agent for the World Grain Exhibition and Conference, to be held in Regina in 1932. They are already preparing to be represented in a number of selected classes at the World's Grain Show in 1932.

In an interesting article on this great undertaking The Gazette states: "Tentative plans are now being considered for the entrance of Peetz grown wheat, rye, barley, sweet clover, and hog millet seed and beans in the competition for the thousands of dollars in prizes offered at the World's Grain Exhibition and Conference, to be held at Regina, Saskatchewan, Canada, July 25 to August 6, 1932."

"People of Peetz feel they can favorably compete in this big show and the local Community Fair Association has already commenced to plan the details of gathering samples that will be displayed against all world comers."

In 25 years—from 1900 to 1925—the reindeer population of Alaska increased from 3,000 to 400,000.

Nearly 4,000 Christmas puddings were shipped from England to the United States last year.

Mature Corn For Silage

Superiority Over Immature Corn Proved By Tests

The superiority of silage from mature over immature corn is clearly demonstrated by tests conducted at the Dominion Experimental Farm, at Brandon, Manitoba. In a series of tests in which a group of six cows were fed alternately, mature and immature corn silage, a marked increase in the volume of milk produced, and in respect to gain in body weight, was shown by the group fed mature corn silage. The relative feed values shown by laboratory tests are—for mature corn 69.1 per cent moisture content, 2.77 per cent protein, .61 per cent fat, 16.63 carbohydrates, 8.27 fibre, and 1.62 per cent ash; for immature corn the moisture content was 82.6 per cent, protein 1.71 per cent, fat .91 per cent, carbohydrates 7.74, fibre 5.45, and ash 1.59 per cent.

Must Use Percentage Of Domestic Flour

Legislation Is In Force In Five European Countries

State legislation requiring millers to use a certain percentage of domestic flour in making of bread is in force in Germany, France, Spain, Switzerland and Portugal, states Hon. G. M. Gillett, secretary of the overseas trade department in a written answer to a question in connection with the proposal that the British loaf should contain a statutory proportion of British-grown wheat flour.

The minimum in France is as high as 97 per cent it is declared. In Spain the minimum is 5 per cent. No percentage is fixed in Switzerland and Portugal, but millers in those countries must take delivery of a certain quantity of native wheat.

Under Soviet Rule

It's not all "cakes and ale" in Soviet Russia, according to Zachary Beauchamp, who has just received a pathetic letter from his brother in Okrus, Siberia. The brother wrote that the government had appropriated his wheat crop, bedding and furniture, leaving only 20 bushels of wheat for his family's use.

FIRST AID SCHOOL ON WHEELS

With a view to extending adequate First Aid instruction to its employees in the outlying sections of the system, one of the three new First Aid cars which have just been completed for the Canadian National Railways has been placed in the Western Region for service.

Fully equipped and in charge of a competent instructor, the car will travel to outlying points, bringing courses of instruction to engine men and train men, agents and construction and maintenance of way men who have ordinarily no means of obtaining this knowledge. While their primary use is for instruction, they are, as well, travelling stations ready to assist in emergency, and are the first cars of this type to go into service on a railroad in Canada.

Canadian National Parks, With Wonderful Scenic Beauty, Form a Great National Asset

The coming season promises to be one of great tourist activity so far as the national parks of Canada are concerned. Officials, both of the Department of the Interior and of the railways, report an unusually large number of requests for information and advance bookings. Large numbers of inquiries have also been received in the department from motorists in practically every section of Canada and the United States, and even from Mexico. The majority of these ask for the shortest routing to Canada's national parks, a description of the different attractions, the accommodations and particularly the facilities for camping.

A comparative analysis of the various applications shows that by all odds the strongest appeal of the parks is their scenic beauty and wilderness quality. An extract from one expresses the demand of many: "I want to visit the parks containing the prettiest mountain scenery, as I want to camp out in the wilderness, fish and go mountain climbing." Some of these letters reveal that the writers know almost nothing of Canadian geography. They have heard a rumour of the greatness of the national parks of Canada and they write to ask where they are and how they can get to them. Apparently it has come to be accepted in the minds of the travelling public the continent over that national parks represent the finest examples of magnitude, power, and beauty in natural scenery.

(By Eva A. Tingey)

BEAUTIFUL AFTERNOON WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Even though chill winds and cold may be still with us, spring is not far away and the shops are stocking up with lovely new materials. All this creates a keen incentive to be thinking of new clothes and making them.

Today's model is very slimming with its V's and tiny front dip, is lovely in cut for the normal and heavy figure. It can be belted at the natural waistline, just below, as so many women prefer. A bow finishes the slender neckline, and others are attached to the wrists.

Marocain, crepe de chine, satin, supple moire, wool, georgette, etc., are lovely tissues for this model. Navy promises to be a popular spring color, but light blues, green, violet, red greys, and beiges are good.

This pattern may be obtained in sizes 16 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

scenery, in a setting of unspoiled primitive conditions, and their name is now sufficient guarantee of their attractiveness.

Visitors to the national parks come with varied needs, some seeking health, others mere recreation, but the majority are impelled by a desire for rest and freedom. Whether they realize it or not they are usually seeking a way of escape from the increasing complexity and routine of our highly mechanized competitive life into a world of peace, solitude, and inspiring beauty. In the face of the majestic grandeur of the Rockies, the enchanting loveliness of such places as Lake Louise, the Yoho Valley, Maligne Lake or Mount Robson, a man is lifted out of a pre-occupation with his purely personal problems into a kind of deeper satisfaction and healing of mind, passing, as has been said, "through wonder into joy."

This, in the final analysis, is perhaps the strongest appeal of the national parks. They supply something which answers to a universal craving, a hunger innate apparently in every human being and which must become more deeply felt as population increases and conditions of life on this continent grow more artificial and restricted. Already, the world over, there is a recognition that our present mechanical development may sweep original conditions everywhere away. That is, perhaps, one reason why the recent announcement of Hon. Charles Stewart, Minister of the Interior, that he hoped the time would come when there would be a national park in every province, has met with such wide approval. The more far-sighted of our people realize that the changes which will probably come about in Canada during the next hundred years will be enormous. While Canada is already leading the world in the reservation of areas for national parks, it is recognized that the needs of the future are sure to be great and that the time to set aside areas of natural beauty is now, while the land is still unoccupied and primitive conditions in many parts still unspoiled.

Visitors to the national parks last year reached over half a million people but this travel, large as it is, is only in its infancy. The creation of new parks such as the Riding Mountain park recently set aside in Manitoba, the extension and improvement of the federal road network, the highways now under way will provide new stimuli for travel and, incidentally, bring in new wealth to the Dominion. Expenditure of visitors to the parks range from a few dollars a day to as high as \$100 per day. One visitor to the Canadian West last year revealed that in addition to hotel and transportation expenses his party of four had spent \$6,000 during a three weeks visit, most of it with retail firms. Every new park created becomes an addition to our capital stock and increases our power of attracting tourists. It helps to swell the prosperity of the railway and steamship companies, hotels, lodging houses, retail and wholesale merchants, and in fact spreads out so as to affect every trade and industry.

The name national park has come to stand for such a high degree of excellence that once an area is set aside as a park, travel tends to flow to it in ever-increasing volume. Both in the returns they can give in health and happiness and in actual economic results the national parks must become an increasing national asset.

New Method For Making Shoes

Factory methods used in mass production of automobiles are being introduced into leading shoe factory of Erfurt, Germany. The footwear is fabricated as it is transported on ways through the factory. The inventor claims the method will reduce costs and increase production.

Submarine cables of the world now have a total of 300,000 miles.

"You look prosperous. What work do you do?"

"I make worm holes in antique furniture."—Karikaturen, Oslo.

RESOURCES WILL BE CONSIDERED BEFORE BUDGET

Ottawa, Ont.—Legislation dealing with the return of the natural resources to the western provinces will be dealt with by parliament before the budget is brought down.

This was stated by Premier MacKenzie King at the conclusion of a cabinet meeting. The prime minister said that it had been hoped to dispose of this legislation, which has for its object return of the natural resources to Manitoba, Saskatchewan and Alberta, as well as the lands in the Peace River block and railway belt to British Columbia, before the Easter recess.

The House of Commons had not been able to put through the legislation, so it would be gone on with when parliament resumed, before the introduction of the budget.

The date when the budget will come down depends, to a certain extent, on the progress which is made with this legislation. The prime minister made an announcement to the effect that it is assumed that the importance of the natural resources legislation has prompted the government to try and get it through before the budget is introduced.

Once the budget is introduced in the House, debate on it will be practically continuous, probably for some weeks. There is also the possibility of the budget debate becoming so strenuous that dissolution of parliament might be precipitated. In that event the natural resources legislation would fall by the wayside, and the work which has been done might be of little avail.

Two Vancouver Teachers Drowned

One Sacrificed Life In Attempt To Rescue Friend

North Vancouver, B.C.—J. A. Hyndman, Vancouver, and F. E. Lotherian, Vancouver, teachers in Carlton school, Vancouver, perished in Lynn Creek before the eyes of 18 girl pupils they had taken for a mountain hike.

Mr. Lotherian sacrificed his life in a gallant attempt to save his friend. The party had reached Second Canyon and Mr. Lotherian, who had crossed the large log that serves as a bridge, when Mr. Hyndman lost his balance halfway across and fell into the boiling current.

Without hesitation, Mr. Lotherian plunged into the swollen creek, but failed to reach his friend, before both were swept over the falls and perished.

Aliens Risk Death To Reach States

Caught By Officers After Crossing Niagara River Above Rapids

Niagara Falls, N.Y.—Crossing the Niagara river in a frail boat, a short distance above the entrance to the treacherous whirlpool rapids, four aliens braved death in their attempt to enter the United States illegally. The aliens were caught by immigration border patrolmen after they ascended the 200-foot bank of the gorge by means of an iron ladder that runs down a steep cliff, but the runner who had transported them escaped.

Japanese Royalty Starts Tour

Yokohama, Japan.—Japan's Imperial newweds, Prince and Princess Takamatsu, sailed from this port, aboard the "Kashima Maru," for Europe, on a honeymoon, which will last over a year, and will encircle the globe. They will visit most of the courts of Europe and will spend ten days in Canada, probably before sailing for home, from some Pacific port, around May 1, 1931.

Pilots For Prince Killed

Cairo, Egypt.—Aeroplane in which the Prince of Wales travelled here from Khartoum crashed at Heliopolis aerodrome shortly after taking off on its return flight to Khartoum. Its occupants were killed. The victims were Pilot Officer K. S. Barron and Aircraftman C. Davies.

Looking For Honors

Geneva.—Venezuela representative at the League of Nations headquarters here asked that his country should have next turn in supplying the president of the league. His request was referred for decision to the next session of the league council.

W. N. U. 1235

Parachute Saves Aviator

'Plane Crashed From Great Height At Sacramento, Cal.

Sacramento, Cal.—Lieut. I. A. Woodring, 95th Pursuit Squadron, Rockwell Field, San Diego, leaped to safety with his parachute when his plane crashed on Mather Field from a height of 2,000 feet during a "dog fight."

Captain H. M. Elmendorf and Lieut. Woodring were flying in review to stage an aerial combat. Suddenly something was seen to fly off Woodring's plane, and at the same instant the flyer leaped from the cockpit. The plane crashed within 200 feet of the spot where the pilot landed.

Lieut. Woodring was pilot of the plane which, in the summer of 1927, was in fatal collision with that of Lieut. Thad Johnson, as the latter missed his landing at Uplands Field, Ottawa, at the close of a flight as part of the escort to Col. Charles A. Lindbergh who flew to the Canadian capital to take part in the celebration of the Diamond Jubilee of Confederation.

Johnson jumped as Woodring's propeller smashed the tail assembly of his machine, but he was too near to the ground and his parachute failed to open.

Australia Wants Native Viceroy

Chief Justice Of High Court Has Been Recommended For Office

London, Eng.—The old and much disputed question of whether the British dominions should have governors of their own nationality is likely to be settled one way or the other by Australia's demand that the successor to Lord Stonehaven should be an Australian.

Sir Isaac A. Isaacs, chief justice of the Australian high court, has been recommended as the Commonwealth's next governor-general, and although the dominion office here is silent, it is understood that a precedent in this connection will probably be established.

Sydney, Australia.—Addressing the annual meeting of the Australian party, Rt. Hon. William Morris Hughes, Maritime Prime Minister of Australia, and its leader, said it did not matter to the party who governed Australia so long as it was governed well. Therefore the Australian party would support good government wherever it found it. He had some criticism, however, for the recent government of Rt. Hon. Stanley Bruce, declaring its only remedy for financial depression was reduction of wages.

Received By King George

Canadian Minister To Franco Has Interview At Windsor Castle

London, Eng.—Canada's minister to France, Hon. Philippe Roy, was received by the King at Windsor castle, where he spent 20 minutes chatting with His Majesty, mostly about Canada.

"I was surprised at the health and vigor of the King," Mr. Roy said after the interview. "It was formerly a doctor and this able judge think the King is in better health than he has been for many years."

Mr. Roy told His Majesty that the first time he saw him was when he (Roy) was a student at Laval University in Montreal in 1891 and the King an officer on a British ship then visiting Canada.

The Canadian minister has seen King George on several occasions since, but this was the first opportunity of speaking to him since his appointment as Canadian minister in Paris.

Ship Enters Wrong Port

Orders Mixed and Seville Cargo Goes To Vancouver

Vancouver, B.C.—One often hears of persons getting into wrong hotel rooms, but seldom hears of a vessel getting into a wrong port. The oil tanker "Los Alamos," bound from San Pedro to Seattle, arrived here and asked the local agent for orders. The master of the vessel soon found out, however, that somebody had blundered and heering was bound for Seattle, not Vancouver. He and his vessel got out of port on the same tide.

The agents are trying to find out who blundered. A "bad half-hour" is promised for someone.

Starts New Air Service

New York, N.Y.—Still being new air trails, Col. Charles A. Lindbergh has inaugurated the new trans-Canada Airways by making a dawn-to-dusk flight from Havana to Cristobal, Canal Zone.

C.N.R. To Be Reconstructed

Endorsement Of Amalgamation Of All Companies Is Expected

Ottawa, Ont.—The reconstruction of the financial structure of the Canadian National Railways will be started from this session of parliament with the passage of a bill to amalgamate into one corporate body all the various companies which now make up the C.N.R. Intimation to this effect came from the Department of Railways and Canals. It is not expected, however, that the further steps of consolidating the various bond issues and otherwise reorganizing the whole financial structure will be proceeded with this year.

The bill to consolidate the companies, it is believed, will not be contentious and will go through with little discussion; but to deal with the financial structure would take a great deal of time, even if the preparations were far enough advanced, which includes consent of the various bondholders. If there is to be a general election this year, the legislation taken so much time would likely find the going difficult.

French Flier Honored

Notable Figures In Aviation Attend Funeral In New York

New York, N.Y.—Representatives of the French Government and notable figures in the field of aviation, including Col. Charles A. Lindbergh, paid their last respects to Count Henri de la Vaulx, president of the Federation Aeronautique Internationale, who was killed in an accident at Jersey City, N.J.

While aeroplanes circled in formation overhead, the Rev. Theophine Wucher conducted a requiem mass in the French church of St. Vincent de Paul. Then the body was removed to the French line pier to sail on the "De Grasse" for the dead aviator's native land.

BIG INDUSTRIES MAY LOCATE IN COAST PROVINCE

Vancouver, B.C.—Three major industries are making extensive investigation with the object of establishing in British Columbia, and one of them—one which would mean the building of a very large industrial plant—is almost certain to decide in favor of this province, according to Premier S. P. Tominie, who passed through Vancouver en route to Victoria after a visit to Eastern Canada. The premier's visit to Ottawa convinced him that the International Society Salmon Treaty will be passed at the present sitting of the Dominion Parliament providing amendments which may be made by the United States are satisfactory.

The premier said that the Dominion Government will investigate the Yukon section of the proposed Alaska Highway. Premier Tominie finds that British Columbia owes a debt to the members of the Australian lumber delegation, whom he met in Ottawa. There is much evidence he said, of the thoroughness with which they did their work.

While in Ottawa the premier took up the matter of the five-year census for British Columbia. The prairie provinces enjoy this at present and he feels that British Columbia would benefit from the same provision. He promised to pursue the matter further.

FRENCH MOTOR EXPERT

Miss Amalasda Norden is probably the most efficient woman in all of France when it comes to knowing her A B C's about motors. Whether they are automobile, aeroplane, marine or any other variety of engine, Miss Norden knows as much if not more, about them than many so-called male experts.

Athlete From West Again In Limelight

Elhel Cathewood Training For Sports' Event In Toronto

Toronto, Ont.—After a long lay-off Elhel Cathewood, from Saskatoon, who set the athletic world talking when she came out of the west three years ago, is resuming her high jumping activities shortly. The holder of the girls' world record of five feet three inches, made at the 1928 Olympic games, has jumped at a meet only once since her return from Amsterdam, and then only gave an exhibition at the Coliseum in the following February. Last summer she spiked herself while training and the injury was long in healing, keeping her out of all the meets. She will give a special exhibition at the Shriners' sports in June. Walter Knox and "Ab" Chilcott will look after her training at Hampden Park.

Coming To Canada

British National Union Sending Party Of Farmers On Tour

London, Eng.—The British National Union, it is announced, is arranging to send a party of farmers to tour Canada during August and September. There had been a great deal of talk lately of British agriculture being "behind the times," and it is hoped the interchange of ideas which will result from the visit may be of value to the party while it is possible they may also be able to give some counsel on certain problems of the soil with which those of the homeland have had more experience than the farmers of the new world.

Expect Early Release

Toronto.—Chinese officials are in communication with the captors of Rev. C. A. Bridgman, Canadian United Church missionary in West China, and hope to negotiate an early release, said a cablegram to foreign mission offices in Canada from the mission station at Chungking, West China.

France Denies Report

Paris.—Information appearing in newspapers of foreign countries to the effect that France would build a new cruiser of 27,000 tons, armed with eight guns of 12-inch calibre, has been officially denied.

King May Appoint New Poet Laureate

Successor To Dr. Robert Bridges Not Yet Named

London, Eng.—The literary and the ordinary public too are wondering who will be the next poet laureate, or if indeed there will be any successor to Dr. Robert Bridges. The question of whether his honorary position would lapse was raised after the death of Lord Tennyson, and Tennyson's successor, Austin, was not appointed until Tennyson had been dead four years.

Lord Tennyson, who died in 1892, was the last poet who actually performed in any measurable degree the direct duty of the poet laureate, namely, the writing of a poem or ode when the monarch was buried with anything of extra moment. The day for writing poetry at the king's command has, of course, long since gone.

But it is likely that His Majesty, after a reasonable interval will, on the advice of the prime minister, confer the title of poet laureate upon some scholarly man of verse and thereby continue this special royal recognition of poetry, which began as early as the days of Chaucer, who received an allowance of wine from the King's wine butts.

Noted Soldier Dead

Sir Gordon Guggisberg Served Empire In Many Ways

London, Eng.—Few men have had a more versatile career or a greater variety of Empire service than Sir Gordon Guggisberg, noted soldier and colonial administrator, whose death here came as a shock to official circles. Sir Gordon had been governor of British Guiana since 1928. He was 60 years of age and Canadian-born, his birthplace being Toronto.

Sir Gordon Guggisberg had a distinguished career in the war and before and after the war served his king in the east, in Africa and in South America. Sir Gordon was a graduate of the Royal Military College at Woolwich, and while military promotion was for a long time a slow matter for Gordon Guggisberg, in this he suffered what was but the inevitable lot of most peace time soldiers.

Canadian Prisons Fireproof

Ohio Disaster Could Not Happen Here Says Superintendent

Ottawa, Ont.—"Positively impossible," was the comment of General W. Piers Fitzhugh, superintendent of penitentiaries here, when asked if a fire such as destroyed the Ohio state institution with the loss of more than 300 lives could happen in any Canadian penitentiary. "Our institutions," said General Hughes, "are absolutely fireproof."

All the cell blocks in the Canadian penitentiaries were fire-proof, he said.

TREATY SIGNED BY DELEGATES OF FIVE POWERS

London, Eng.—The "London naval treaty of 1930" was signed by the delegates of the five powers in St. James Palace, and the conference opened by King George V, three months ago adjourned.

A few hours later the U.S. delegates entrained for Southampton and boarded the "Leviathan," which waited a day for them and in which they sailed for home. The French and Italian delegates departed for Paris and Rome respectively, after the signing ceremonies were over.

The full text of the treaty was officially made public at the moment when Secretary of State Henry L. Stimson sat in an old state chair covered in red velvet and appended the first signature to the Morocco-bound document opposite a red seal with a blue ribbon attached. It contains nothing not exhaustively discussed previously in these and other despatches.

The 92-day-old conference began its sixth and final plenary session in a dignified, almost sombre mood which was maintained during half an hour of oratory. But at the end the veteran French statesman, Foreign Minister Aristide Briand, exercising all his famous charm, wit and good nature, brought the delegates, their advisors and the hundred correspondents who filed Queen Anne's drawing room to their feet laughing and applauding. The assembly transferred from "the collective ownership of the conference to the private ownership of our chairman, Monsieur Macdonald," a gold pen presented for the treaty's signature.

DISORDER IS SPREADING IN INDIAN EMPIRE

Bombay, India.—British authority is confronted with an increasingly grave situation in India. Serious rioting and fighting with troops are reported in widely-separated sections of the Empire as the anti-Indian movement spread. An Indian rebel, armed with two revolvers, was killed at Chittagong, after grave disorders at Peshawar, thousands of miles to the west.

At Peshawar, important outpost city near the entrance to Khyber Pass, one or more British soldiers and 20 native rioters were killed reports said, when a mob protested arrest of several anti-government agitators.

A Lahore despatch, explaining the events, said that the outbreak was suppressed only when Gurkha troops poured machine-gun and rifle fire into the mob, which had held up an armored car, poured kerosene on it, and burned it. Both occupants were turned to death.

At another point in the bazaar, a British sergeant on a motorcycle approached the rioters, who pulled him off his machine and hacked him on the face with an axe. He was said to have died of his wounds. The deputy commissioner of police and other police officers were badly wounded and sent to hospitals.

British and Gurkha troops took absolute charge of the city, and were said to be maintaining a strong guard at the gates to prevent incursions by the hill tribesmen, who are of far different fighting stock from the Hindus and swarm down when there are disturbances with the hope of loot. There are sections about Peshawar over which British authority never has been fully extended.

Alberta's Election Date Set

June 19 Is Day Selected According To Official Announcement

Edmonton, Alta.—The Alberta provincial election will be held on Thursday, June 19. Official announcement of the date was made by Hon. George Hoadley, acting premier, speaking for Premier Brownlee, who is at present at Vancouver.

The U.P.A. government still has one year of its five-year term to serve, but the calling of an election has not been entirely unexpected as there have been rumors for some time that this would be done.

The following statement was issued by Hon. George Hoadley, on behalf of Premier Brownlee, in announcing the election:

"In keeping with its promise during the recent session that if an election were to be held this summer, ample notice would be given, the government announced its decision to hold an election this summer, with polling day fixed for the nineteenth of June."

Conference Of Premiers Indefinitely Postponed

Original Date Was Not Convenient For All Officials

Winnipeg, Man.—Parley of prairie premiers, set for Winnipeg, to discuss immigration, has been indefinitely postponed. Premier Bracken of Manitoba states that the conference, at which a policy was expected to be outlined for Manitoba, Saskatchewan and Alberta, will probably be held some time next month.

The original date—April 29—was found not to be convenient for all officials concerned. If, and when the prairie premiers do gather at Winnipeg, their session will be preliminary to the Dominion conference, at which the provinces will be represented. Such a conference is planned for mid-summer at Ottawa.

Quarantine Districts Selected

Ottawa, Ont.—Several rural municipalities in Saskatchewan have been constituted restricted areas or quarantine districts for the eradication of bovine tuberculosis under the animal contagious diseases act. The proclamation creating the restricted areas has been officially issued. Municipalities involved are Montrose, Cory, and Warman, Wood Creek and Big Arm.

Water Tests For Churchill

Ottawa, Ont.—Tests of the water which is to furnish the supply of Churchill are being made for the Department of Railways and Canals and so far the results have been satisfactory. The chief fear was that the water might contain an accumulation of various salts. While the water is said to be termed "hard," it is suitable for human use.

One Day Old, but Lively

Every spring millions of baby chicks go out from the British Columbia coast and Vancouver Island to the interior of the province and the Prairie Provinces. Hatched earlier on the milder Pacific slopes than elsewhere in Canada, they are rushed by Express across the country to poultry breeders inland. Taken when they are but one day old, they are placed in cardboard boxes with breathing holes punched in them, and loaded into express cars kept at just the right temperature for their benefit. They can go 72 hours without food or water. Above package has just been landed at Vancouver, and is being examined prior to train shipment. According to officials of the Canadian Pacific Express Company which annually handles millions of these fluffy balls, the traffic is growing steadily from year to year.

Welcome News For Canada

U.S. Board Announces Plan To Take Our Money At Current Rates

The Federal Reserve Board of the U.S. has issued the following official statement relative to U.S. exchange on Canadian currency.

"The Federal Reserve Board announces that a plan has been worked out, at the suggestion of the department of commerce, and will be put in operation for handling Canadian currency deposited with federal reserve banks, at a minimum of the actual collection charges incurred by them.

"The discount on Canadian currency brought into the U.S. by travelers has frequently ranged as high as 10 and sometimes even as high as 20 per cent., at places remote from the border line. This is regarded as excessive and has given rise to some feeling in Canada, especially as U.S. currency is generally accepted at par in Canada.

"The Federal Reserve Board has taken the subject up with the federal reserve banks, and they have agreed to offer their facilities to member banks for the collection and conversion of Canadian paper currency into U.S. currency at the current rates of exchange. The federal reserve banks will absorb the cost of shipping Canadian paper currency from the member banks to their respective federal reserve banks but will deduct an allowance to cover the actual exchange charges, and insurance and shipping charges, if any, from the federal reserve banks to the points of conversion into U.S. currency. The average cost during the past three years of converting Canadian paper currency into U.S. funds, including both exchange and shipping charges, has averaged less than 1 per cent.

"This method of handling Canadian currency by the federal reserve banks, will, it is hoped, result in substantial reductions in the cost of collecting this currency. The board feels that if member banks co-operate in this matter by extending a similar service to their customers, Canadian tourists travelling in this country will find American merchants willing to accept Canadian currency at or near par."

Best Market For United States Goods

For Second Consecutive Year Canada Has Headed List

Canada was shown by the Chamber of Commerce of the United States to have been the best market for United States products during 1929, for the second consecutive year and also the principal distributor of foreign products in the United States.

An analysis, based upon Department of Commerce statistics, showed that Canada's purchases of United States products totalled nearly \$1,000,000,000 and were 18.1 per cent. of the total exports. They were larger by \$53,788,000 than in 1928, when Canada, for the first time, became the major buyer from the United States.

The United Kingdom was second as an export market, buying goods valued at \$867,980,000.

Imports from Canada were valued at \$504,000,000, the largest post war total, and an increase of \$14,974,000 over 1928. Japan was second in export to the United States, shipping over products valued at \$431,873,000.

Eats Like An Ostrich

An Alsatian puppy with the ambitions of an ostrich has been saved from the consequences of his appetite at the Royal Veterinary College, in London, England. From his stomach were recovered 67 nails of various sizes, two screws, three bolts with nuts, one bolt, 16 brads, one stud, a piece of steel drill and a lump of coal, the whole weighing 15 ounces.

"I see where my time has come," said the man as he received his watch from the mail order house.

"But you live on the other side of the road."

"Bother. Now I must walk backwards."—Wahre Jakob, Berlin.

W. N. U. 1835

Douglas Fir Timbers Improved By Age

Experiments Show Gain In Strength After Fifty-Five Years' Service

Douglas fir timbers gain in strength after 55 years of service, according to E. H. McAllister, professor of mechanics, at the University of Oregon.

Professor McAllister has just completed an investigation of the timbers taken from the Hayden Bridge, a structure erected near Eugene in 1874, and has found them to be in an excellent state of preservation. The Hayden Bridge was of the old covered type and it is the professor's conclusion that Douglas fir can be preserved in sound structural condition for at least half a century by the simple expedient of keeping it covered from the weather and providing a free circulation of air.

More than 200 tests on machines which exert from 30,000 to 200,000 pounds pressure were made on the old timbers. For basis of comparison, similar tests were made on both green and seasoned pieces of the same size. The average strength was found to be in excess of the average strength of new timber in green condition, while in most cases it was well above the average for unused timber that had been air dried for two or three years.

Professor McAllister's report states that the tests proved conclusively that age does not exaggerate the influence of knots or other defects in the wood, and that tests on the small clear pieces proved that the quality of the wood fibres does not deteriorate with age.

One of the surprise features of the experiments was the high strength in compression parallel grain. This was found to be slightly more than double the corresponding strength of the new air-dried timber, and about 24 times that of new green timber. Out of twelve old beams tested not one failed first in compression and only five of the 54 small beams broke after sustaining very high stress.

In the tests of other new bridge stringers made by the United States Forest Service, approximately three-fourths of the whole number failed in compression.

Cannibals Turning To Football and Cricket

Natives Of Solomon Islands Greatly Interested In Sports

Cricket and football have taken the place of murder and cannibalism as the national outdoor sport of the Solomon Islands.

Dr. C. E. Fox, in charge of the native education on the islands, has just returned to Auckland, New Zealand, with the news that the natives are beginning to forget their barbarous pastimes and to live a more orderly life.

"Solomon Islanders make very good footballers, even though they play bare-footed," said Dr. Fox. "They are very skilful at passing and remarkably fast."

"Cricket is our national game, however," Dr. Fox added, "I do not think you will find brighter cricket in any other part of the world. We play matches of two innings a side, and the time limit is two and one-half hours. Consequently, no time is lost, and there is no such thing as playing for a draw. In one match 56 runs scored off one stroke."

The ball was hit into the sea, and square leg, who objected strenuously to chasing it, was finally thrown into the water by the other members of his team, in order to retrieve the ball. The batsmen, meantime, were steadily piling up the runs.

"On one occasion the ball was hit into a tree, which was cut down by the fieldsmen. The rules of lost ball and out of bounds do not apply when there are 22 enthusiastic Solomon Islanders on the field. They are magnificent fieldsmen, and can catch any sort of ball with ease. Their bowling, too, is very accurate, but their batting is naturally, rather unpolished. It is interesting to watch the batsman take centre. This is regarded as a form of ritual, for as soon as it is done, the batsman promptly steps back a bit to leg, and prepares to hit at everything."

Prince (in hotel)—Twenty-five francs for peaches! They must be scarce this year.

Manager of Hotel—Your Highness, it is not peaches that are scarce, but prices.

"Closer to the fair?"

"What fair?"

"Paper says, 'Fair here today and tomorrow.'"

Excavation of Trajan's Market Place in Rome has been completed, and altogether 150 stores have been found in the ancient shopping centre.

Clean Your Seed

Results Obtained More Than Pay Farmer For Trouble

"As thou sowest, so shall thou reap" wrote Cicero centuries ago and Biblical and mundane authors have kept this maxim of nature ever before us; and the moral is—"you may not always be able to sow the best of seed, but you can always sow clean seed."

Not only is it a well known fact that clean seed is a most effective method of weed control but experimental work by the Dominion Department of Agriculture, and the Canadian Seed Growers' Association shows that clean seed pays.

There is really no excuse for a farmer not planting clean seed because if he has not the time and means for doing it himself there is, or can be, available to him competent means of cleaning his seed.

The cleaning of seed is a practice which has been followed ever since man first began to plant, the methods ranging from the primitive to the ultra-modern. We are most of us familiar with the primitive practice of holding a measure of grain or seed shoulder-high and letting it drop to the floor, the breeze carrying the chaff along with it, leaving a pile of seed at the feet of the cleaner. We are also familiar with another primitive practice of float-testing many types of seed, particularly mangel and sugar beet.

The ultra-modern seed cleaning methods range from the government seed cleaning plants at Moose Jaw, serving a part of the prairie area, to the adaptation of screens and sieves in the fanning mill.

The cleaner the seed the better its quality and while you may not be able to afford No. 1 clean seed always, you can afford, and will be more than repaid, to see that the seed you use is clean.

Poultry Will Fly

European Exhibits For Congress Will Travel By Air

Quite abreast of the times exhibitors at the fourth World's Poultry Congress, are already arranging an aeroplane conveyance for fancy birds which will be shown in the live stock exhibition, and which they desire to have arrive at the Congress in the pink of condition. Leading air services are making arrangements to deliver birds from points in Continental Europe to the Crystal Palace as soon as the Congress officials are ready to take delivery.

To find themselves really up in the air will give the elite of the poultry world who travel in this way something really worth while to crow and cackle about.

Loss Is Heavy

Twenty-six million dollars is the price paid by farmers and poultry raisers for loss through diseases in poultry flocks annually according to recent estimates. Most of this loss is caused by the internal parasite and according to F. C. Elford, Dominion Poultry Husbandman, much of it is preventable. A good deal of it, he points out, can be eliminated by keeping young chicks away from adult birds and on absolutely clean soil.

Holland Plans Produce Airport

Delft, Holland, will establish a farm produce airport. From it will be shipped fresh vegetables, fruits and flowers, for which the district is famous, to leading cities of Europe. Large amounts of fresh fruit, early vegetables and cut flowers have already been successfully transported by plane.

Give Chicks A Fair Show

If Kept In Separate Pens Results Are Effective

The baby chick becomes a laying pullet in about five months, but only with proper handling and when given an even break.

W. A. Brown, chief of the poultry division of the Dominion Live Stock Branch, emphasizes one thing essential to the development of pullets which will begin to lay when egg prices are good; that is, give them a fair show. By this he means that they must be kept separate in pens by themselves where they will not be robbed by older birds of the foods provided especially for, and so necessary to, their proper growth and development.

Poultry records show that the time-honored practice of letting chicks run with old hens does not pay and that to get effective results in respect to pullets for egg production complete separation must be provided.

To allow chicks to run with the older hens either at large or in a common pen is the biggest mistake the farmer or poultryman can make, Mr. Brown observes. It was the repeated failures in farm practice in this connection which led to a special investigation as to its cause. The study of the problem began in the separation of a mixed flock which was giving poor results. The old laid-out hens were discarded and each age group and type were penned separately. One immediate and surprising result of this separation was that egg production from the smaller number of selected hens remaining very soon rose above the total egg production of the mixed flock.

Another thing which was found from this particular experiment was that birds did best when grouped in separate pens in classes of their own age and kind. There are certain well defined stages of development in the chick, the pullet, and the hen, and where all are allowed to run together none function as they should but when separated into age and type groups feeding can be controlled and regulated with direct regard to the needs and condition of each hen.

On every farm where it is desired to have laying pullets early in the season, when the price of eggs is particularly attractive, one safe rule to apply is to put baby chicks in a pen by themselves and keep them separate throughout the season. Properly fed and looked after they will become laying pullets weeks before they would were they allowed to remain in the mixed barnyard flock, and incidentally they will mature for utilization as dressed poultry if denied, much earlier than would otherwise be possible.

Canadian Roses For China

Bushes Numbering Thirty-Five Varieties Shipped From British Columbia

Three hundred British Columbia rose bushes, numbering 35 varieties, have been shipped to the British Legation at Peking, China, to adorn the already famous gardens. The bushes were contributed free of charge by three nurseries—H. M. Eddie & Sons, of Sardis, the B.C. Nurseries, of Vancouver, and the Layritz Nurseries, of Victoria. The bushes were carefully assembled and packed at Victoria under the supervision of E. W. White, district horticulturist, of the Provincial Government, paying the freight and packing charges.

Australia's coal strike has continued for several months.

Turn Loss Into Gain

Growing Demand For Dairy By-Products Is Increasing Revenue

Dairy production in Canada is slowly forging ahead, but along new lines. The Dairy and Cold Storage Branch of the Dominion Department of Agriculture, report an increasing demand for what might really be termed the by-products of the dairy industry. Dairy production in Canada heretofore has been expressed largely in terms of butter, cheese and cream. The production of butter and cheese shows a decline in volume, while "miscellaneous factory products" and "milk consumed fresh or otherwise" show a big increase, and it is this increase which is responsible for the net gain in dairy production during the past five years of over \$13,000,000. More fresh milk and cream are being used today than ever before; ice cream continues to grow in popular favor, and there is a striking increase in the amount of milk which is being processed for sale in evaporated, condensed, concentrated and powdered form.

A Musical Feature

Treat Promised For Visitors To World's Poultry Congress

By a happy coincidence, 1930 is the triennial festival year, and visitors to the World's Poultry Congress, will have the unique opportunity of attending a performance of the "Messiah," which will be given during the Congress week. An orchestra and choir of 2,000 voices will be in charge of Sir Thomas Beecham, who has offered his services as conductor as a free gift. Under his direction the performance will be a contribution of the first importance, and will afford an unusual opportunity for visitors to the Congress to hear one of the world's most famous composers' works rendered on a scale and in volume which alone begins to interpret a real masterpiece of music.

Only One Name Allowed

Practice Of Giving Middle Name Once Forbidden In England

The practice of giving a middle name to children was unknown in England before the period of the Stuarts, and it did not become at all common until Georgian times. There was, in fact, a law on the statute books forbidding parents to give more than one name to their children. The same conditions prevailed in North America. Not a single member of the Mayflower had a middle name and there are only three among the signatories to the Declaration of Independence. The first five Presidents of the United States had one Christian name only.

Extending Hydro System

Extension of the provincial hydro system to all main centres of the province within the next three years is the aim of the Manitoba Government, as outlined by Hon. D. G. McKenzie, administrator of the power system, calling for expenditures of \$2,660,114 which includes \$902,808 for transmission lines and \$220,000 for farm services.

Made Fortune In Year

Achieving notoriety as the producer of the war play "Journey's End," Mr. Maurice Brown, who was unknown in theatrical circles a year ago, has purchased the Globe and Queen's theatres in the West End of London for \$1,000,000. This sum is a portion of the profits made from the play.

Hornsey, England, has banned the use of loud speakers and phonographs in stores.

The Prevention Of Sickness

Periodic Examination Would Save Great Numbers Of Lives

In the Province of Ontario, one person out of every three dies ahead of his time, and at that, Ontario is no worse in this regard than the other provinces of Canada. Better in fact than some of them.

Professor Winslow, of Yale University states that 29 per cent. of all deaths in the United States Registration Area, could be postponed. An analysis of Ontario statistics shows that in this province 34 per cent. of all deaths could be postponed. And those statistics are official, and the analysis is that of competent health officials.

It's shocking to walk along the street knowing that every third person you meet has death leaning affectionately over his shoulder. Such wastage would not be permitted in industry. What causes this gigantic wastage of human life? The answer is, just plain, human thick-headedness.

If one person in every three was killed ahead of his time in a railway crossing accident such a public hue and cry would go up that within a year, grade-crossings would be eliminated, regardless of expense. But our one-cut-of-three loss is not so dramatic as that. It is brought about by the stealthy ravages of diseases, and therefore it isn't noticed. For people have not yet learned that many of the diseases that kill their children, their husbands and wives and friends, could be prevented.

An inconceivable amount of sickness and premature death could be eliminated if people could be induced to get thoroughly examined, regularly, by their physicians. There is an enormous amount of incipient disease of many types which, being neglected in early stages, result in serious disability demanding hospital care and often resulting in death.

One of our leading public health authorities says: "Sickness costs Canada \$311,000,000 annually. The loss of future earnings through premature death is conservatively estimated at one billion dollars a year." Diphtheria kills 12,000 Canadians every year, while 12,000 other Canadians suffer from this disease but recover.

Every science offers you a toxoid treatment to make you and your children immune to diphtheria. This disease is a frightful child-slayer. Have you taken advantage of toxoid to protect your children, or may they be among the stricken 12,300 during the next twelve months—or possibly among the doomed 1,200?

Typhoid fever killed 1,100 people in Canada in 1927. Yet typhoid fever is absolutely preventable by means within the reach of everyone. Tuberculosis—8,000 people died of tuberculosis during 1927. Yet we have cut the death rate from this scourge in half, during the past 25 years, and we can absolutely eliminate it with adequate health machinery.

Cancer—early treatment (which is assured to anyone taking the trouble to undergo an annual or semi-annual physical examination), guarantees success in curing cancer, in many cases.

Venerable diseases—the organized and successful attack that death is making upon venerable diseases is an utterly convincing proof of the progress that can be made in disease-control when all forces of the state combine in a necessary undertaking.

Japan's Oldest Temple

There is still standing in Nara a Buddhist temple, Horyu-ji, the oldest in Japan, built more than thirteen hundred years ago, but built of wood, probably the oldest wooden structure in the world. It is filled with priceless art treasures. Its mellow-toned bells seem to speak of romantic memories of long ago, of the days when Nara was at the height of its glory, and when men of genius were laying the foundations of the nation's art and literature.

Nitrates used in making fertilizer are among the most important by-products from coal.

"You don't wear your glasses now?"

"No need with the present women's fashions."—Lustige Blaetter, Berlin.

CANADA'S REMARKABLE ADVANCE IN MINERAL PRODUCTION

During the thirty years embraced by the period 1900-29 inclusive, the annual value of Canada's mineral production has on no fewer than sixteen different occasions surpassed all previous marks. While the effect of the upward trend of prices must be taken into account, especially as regards the war period, this record is nevertheless a remarkable illustration of sustained growth. It stamps the mining industry as a foremost force in the march of Canadian development during the twentieth century.

The sheer increase in value—from less than \$50,000,000 in 1900 to well over \$300,000,000 in 1929—is amply impressive in itself. But the manner in which it has been attained is no less notable. There has been a great advance in variety of output. At the opening of the century gold and coal were the only two large items of Canada's mineral production, whereas the Dominion's present-day mining industry owes its magnitude not only to coal and gold, but to copper, nickel, lead, silver, zinc, asbestos, and, in short, to perhaps as wide a diversity of resources as any country affords to mining enterprise.

People who prize the finer things of life usually demand Red Rose Orange Pekoe Tea. A money-back guarantee with every package.

CHAPTER X.—Continued.

"I wonder who wove you," she mused dreamily. "You must have seemed almost a part of the weeks passed and he saw your loveliness unfold. Did he read the finishing of his task, I wonder, knowing that at its end he must give you up forever? And did he know that when he was only a memory his work would live, cherished by some one thousands of miles from his own birthplace?"

She stooped, to brush a hand over the silky surface.

"I think you were woven on an old, old loom," she murmured. "You were, perhaps, the only beautiful thing in some humble room. I think that little children watched you grow, and touched you with small, reverent fingers. I think..."

Charlman stiffened, suddenly conscious that a shadow was lying across the rich wine color of the old rug; and the blood fled to her cheeks as she saw Jim Bennett in the doorway. Then she sprang up, laughing, in real confusion.

"How long have you been there, listening to me go on like that?" she asked.

Jim grinned. "Not long enough to be called an intentional eavesdropper; but long enough to wonder..."

"Wonder what?" urged Charlman as he paused.

"If you'd gone today—making such passionate love to an inanimate object. Is it something new?"

"New!" echoed Charlman in amazement. "Can't you see with a single glance that it's ages old? Oh, Jim! wouldn't it be wonderful to furnish a home with beautiful things like this? Why, just to walk on it seems a—profanation."

"In that case," commented Jim, seating himself on a corner of the doctor's desk, "I don't know as 'Home, Sweet Home' would be a real comfortable retreat. If a fellow got hollered at every time he happened to step on a rug that was in the way—well, you're right, Charlman, the air would be liable to become

Picture of Health Now

"In May and June I was badly run down and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Pummich, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound

W. N. U. 1835

noon, for all I care! Just wait till I tell Grandma, and—"

Jim laughed, a queer, choky little laugh that she knew came hard.

"Don't be an idiot!" he said. "You haven't hurt me, Charlman; and I won't have you going just for that reason. Honestly, I don't want you to go now. I've got things to mull over in my mind, and you're a disturbing influence. Run along and get your work done. I'm all right."

"But I'm not," smiled the girl. She was gently propelling him out of the doctor's office and toward the house. "I feel the need of air and sunshine, and it's your duty to see that I get both. You talk with Grandma while I set the dinner table, so I won't feel so hurried to get back."

She was away, leaving him standing at the door of the old parlor where Grandma Davis was keeping her accustomed vigil.

"Hello, sonny," she greeted him. "What you doing away from the bank this time o' day?"

"Running down some interest money," explained Jim. "I've persuaded Charlman that it's too good a day to waste indoors."

"So 'tis," agreed the old lady, "and a ride'll do her a lot of good. I'm hoping maybe she'll get out more often when Doctor Carter gets the car he's ordered. It'll be real natural for him to take her when he rides out in the country, won't it?"

"Too darn natural," replied Jim; then, to change the subject: "What's been happening on Broadway this morning, Grandma?"

"You mean Main Street? Well, I'll admit I've seen things more lively than they've been today, but Lizzie Baker lost her screwdriver petticoat right on the sidewalk, and had to step out of it and scurry home."

"Wasn't that a sight to see that?"

"Gosh! I'll say it was!"

Jim laughed so heartily that Charlman, setting the table in the room beyond, breaded a sigh of relief, and called: "What's happened? Is it so funny?"

"It wasn't funny for Lizzie Baker," replied Grandma. "You leave that table, dearie. If you're late back the doctor can set it himself; and you mustn't keep Jim waiting. There's nothing lovelier than a man like being kept waiting."

"The table's set; and I won't keep him waiting a minute longer. Ready, Jim?"

He nodded, rising slowly as if reluctant to take his eyes from the picture the girl made as she waited, with the dusky hair as a background for her blue gown. "A pink scarf across her arm—added a splash color that matched her cheeks; and if the young man had been slow to appreciate the beauty of an oriental rug, he was certainly not slow to appreciate the charm of his old playmate."

"Where's your hat?" asked Grandma. "You're not going clear to South Wickfield without a hat?"

Charlman laughed. "I most surely am! After the gorgeous greenness that Jim's accustomed to, I'd be ashamed of—"

"Shucks!" broke in Grandma. "Your old black straw with the pink roses is enough sight prettier than that—that!"

Words failed her, and the two young people laughed as Jim responded: "Don't worry, Grandma. She doesn't need a hat—not with all that woman's crowning glory to keep off the draughts. Come on, Charlman. We'll have to break the speed laws if I get you back in time to cook dinner for your boarder."

"Don't you do any reckless driving," warned Grandma, as they moved away. "I'm not so foolish that I can't start dinner if you're late. If you go past the Bascom's you stop and get that mail order catalogue I lent to Emmy. She's liable to forget to return it."

(To Be Continued.)

Does Not Always Work

Rich People Who Dress Poorly Sometimes Get Shabby Treatment

That the poor must dress smartly while the rich can dress as they like is a suggestion not borne out by the recent experience of one of Britain's richest men, who was turned away from a London hotel because he looked shabby. As a matter of fact, his income is about \$5 a minute, and the wage-bill of his domestic staff over £200 a week. Well known on the Scottish golf links, he has been pulled up more than once by club colleagues who have noticed that the soles of his boots have seemed desirous of parting company with the uppers.

CORNS RELIEVED instantly!
PUTNAM'S Corn Extractor

Don't "Dose" Headache

Rub forehead and temples with Vicks; also melt in hot water and inhale the vapors.

This clears the head and usually brings quick relief, especially in those cases which so often accompany colds.

Using Automatic Pilots

British 'Phanes Make Long Flights With Robot Control

The entire squadron of British night bombing aeroplanes, fitted with "robot" electrical controls, has flown continuously as far as 400 miles without human pilots taking charge. Routes from South England to Scotland have been followed, with automatic pilots, adjusted by radio from the ground, in complete charge, and the aeroplanes brought safely to a predetermined destination. The automatic landing is accomplished by means of a weighted wire, which, as soon as it comes in contact with the aerodrome, causes the aeroplane to "dive" quick and glide in with the engine throttle back.

HEALTHY CHILDREN ALWAYS SLEEP WELL

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing. It is only the sickly child that is cross and restless. Mothers, if your children do not sleep well; if they are cross and cry a great deal, give them Baby's Own Tablets and they will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation, colic and indigestion and promote healthy sleep. They are absolutely guaranteed free from opiates and may be given to the newborn babe with perfect safety. You can obtain the Tablets through any medicine dealer at 25 cents a box, or by mail, post paid, from Dr. Williams' Medicine Co., Brockville, Ont.

Maxims Treasured By King Are Hung On Library Walls At Buckingham Palace

Maxims treasured by the King and hung by him on the walls of his library and business room at Buckingham Palace, were quoted by Sir Charles Fergusson, Governor-General of New Zealand, at a school which he visited during his farewell tour. They were: "Teach me to be obedient to the rules of the game. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other. Teach me neither to prefer nor to receive cheap praise. If I am called upon to suffer, let me be like a well-bred beast that goes away to suffer in silence. Teach me to win, if I may; if I may not win, then, above all, teach me to be a good loser. Teach me neither to cry for the moon nor over split milk."

A Real Asthma Remedy. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative in fact, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

Idea Is Alright

But People Should Build Foundation Under Air Castles

"If you have built castles in the air, your work need not be lost; that is where they should be. Now put the props under them," said Henry David Thoreau. Helen Keller says we cannot always realize our ideals, but we can always realize our realities, and our ideas must be practical if we are to make a religion of them and live by them. Phillips Brooks expressed a high ideal in these words: "We reduce life to the pettiness of our daily living. We should exalt our living to the grandeur of life."

The people of the Middle Ages believed that certain words possessed magical powers.

Britain claims to have the finest gold-beaters in the world.

Use Minard's for Burma.

Where Children Broadcast

Alberta Red Cross Gives Interesting Program Every Week

In a certain broadcasting station in the capital city of Alberta, there has been an unique broadcast, in which the artists were quite young children. C.J.C.A. The Journal, Edmonton, has for many years kindly donated its station to the Alberta Red Cross for one hour weekly. This period has been popular with the country people, especially with groups of women's service clubs, such as the Women's Institute and the U.F.W.A. Programs consist of health talks; Red Cross songs, dramatic sketches, etc. By special permission the program was turned over for an afternoon to a Junior Red Cross Branch of Grade Six pupils from Norwood school.

These young people gave an interesting feature in the presentation of a regular monthly meeting, with the young president in the chair, and the usual procedure of business etc.

The entertainment period included a pageant of health, citizenship, and happiness, entitled the Red Cross Junior. This little play was composed for the occasion of the presentation to Canada of a beautiful banner from the British Juniors to Canadian Juniors during a visit to England of Miss Jean Browne, the National Director of Junior Red Cross in Canada. The clear young voices of the Juniors rang over the ether with splendid power, and the unusual broadcast of these twenty young Albertans was listened to with much interest by the many friends of the air.

Where Fate Steps In

People Who Come Through Serious Danger Caught By Simple Accidents

Not long ago William F. Scott, survivor of more than 200 parachute jumps and said to be the champion of the navy at this form of sport, received a fractured skull and other serious injuries near Washington. In a parachute jump? Not at all. In an ordinary automobile accident. Thus once more we see the scurry tricks that Fate reserves for men who tempt her too much. Oscar Palmquist of Bridgeport, Conn., who found himself in the Atlantic Ocean after the Titanic went down, and who swam about for hours before he was picked up by a rescue ship, drowned a few years ago in a pond six feet deep. Edward Whymper, first man to climb the Matterhorn and conqueror of peaks all over the world, broke his collar bone when he slipped and fell while mounting the steps of a lecture platform. And Wallingford, we seem to recall, after availing the world out of dollars, finally went to jail because he had forgotten to deposit funds to cover a \$100 check.

That is the trouble with Fate; she doesn't come out into the open and fight fair with the weapons that have been chosen. She sneaks up and delivers a foul blow from behind. No doubt that is why she is so terrible.

Apples Bring High Price

Cold storage of McIntosh Red apples promises to make this variety a popular winter apple. British Columbia "Mac"s, are bringing the highest prices of any apples on the New York markets at present.

Campers Carry Minard's

A Valuable Table

Isaac Feather, of Etnaus, Pennsylvania, owns a library table built of 5,000 blocks of wood. The table is made of mahogany, walnut, red cedar, oak, poplar, and white pine wood which has been seasoned for more than 100 years. The designs include stars, diamonds, circles and semi-circles. Feather, a bricklayer, worked on the table in his spare time for a year.

Japan now has 37,000,000 postal savings depositors.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the 60 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

PAIN

No matter how severe, you can always have immediate relief:

Aspirin always stops pain quickly. It does it without any effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

ASPIRIN

TRADE MARK REG.

Little Helps For This Week

"Giving thanks always for all things."—Ephesians 5, 20.

Whatso it be, howso it be, Amen! Blessed it is believing not to see: Now God knows all that is; and we shall then—

Whatso it be!

God's will is best for man, whose will is free;

God's will is better to us, yea, than ten

Desires, whereof He holds and weighs the key—

He knows all what men, alets each where and when—

Whatso it be!

—Christina G. Rossetti.

Thou alone knowest what is good for me; Thou alone art Lord of all; do therefore what seemeth to Thee best. Give to me or take from me; conform my will to Thine; and grant that with humble and perfect submission and in holy reverence I may be disposed to receive the orders of Thy eternal providence, and may equally adore every dispensation which shall come to me from Thy Hand.—Pascal.

Nurse Gains 7 lbs. In 2 Weeks With Yeast and Iron

"I am a nurse at the hospital," writes Miss Martha Burns, "and I want to let you know what I am going to recommend your Ironized Yeast."

"It gave me a good appetite. I got strong and gained 7 pounds in 2 weeks. I could write all day about how much good Ironized Yeast did me. You would be surprised at the strength I gained in 3 or 4 days."

People everywhere are amazed at the wonderful benefits of Ironized Yeast. Many write that they were debilitated when they started. But after taking it regularly for only 3 or 4 weeks they gained 5 to 15 pounds. Ugly hollows fill out. Skinny limbs become gracefully rounded. Bleached skin gets clear and beautiful.

Only when Yeast is Ironized is it more effective—for Iron is needed to bring out the weight-building, and strengthening values of Yeast. Pleasant tablets in a handy bottle. Never causes gas or bloating. Safe—no harmful drugs.

Go to any drugstore today and get a full size treatment of Ironized Yeast. If after this generous trial you are not delighted, your money back instantly from manufacturer.

Sheep Industry Growing

Although the sheep industry of the East Kootenay is still in its infancy, it is growing yearly in volume and prospects are for further expansion this year. The dry atmosphere, wide free ranges and the entire absence of disease are said to be special recommendations to the farmers to run small bands of sheep.

Mothers can easily know when their children are troubled with worms, and they use no time, money or bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Prize For Wheat

The Saskatchewan Board of Trade is offering a prize of \$350 to the farmer in the district who produces the best wheat to be exhibited at the next winter fair.

One tasteless spoonful in water neutralizes many times its volume in acid. The result is no time, money or bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Heard About Town

Nelson Murray is a Calgary visitor this week.

Miss Muriel McIntosh is teaching for the week at Lanfane.

W. Holder, of Rearville, left Wednesday morning for Calgary.

Miss Sadie McLean is teaching this week at practice school at Myrtle.

H. H. Fisher left Wednesday morning for Hague, Sask., where he will visit his parents for a few days.

Don't forget the concert by the C.G.I.F. and Trail Rangers in the United Church tomorrow (Friday) evening.

Mrs. M. Bjork and family, who spent the Easter vacation on the farm, at the river, returned on Saturday.

Mrs. J. C. Turple, with her new baby boy, Rex Eugene, arrived from Hanna on Wednesday morning.

Marjorie and Jack Lee returned Monday morning, after spending the Easter holidays at Kindersley.

Born to Mr. and Mrs. Max Lawson (nee Vera Vennard, of Chinook), of Alaska, on Tuesday, April 22, a son.

Marvel Milligan on Tuesday left for Hanna, where she will visit friends for a day before returning to Calgary.

Seedling has been at a stand still all this week owing to the heavy rains. However, the best part of the seedling is completed. The farmers, as well as all others, feel happy over getting such an abundance of moisture.

Heard About Town

Miss Ethel Young is teaching this week at Peyton school.

Miss Ida Marcy is teaching at Longdale school this week.

Mrs. C. W. Rideout and two daughters returned from Calgary Sunday morning.

The local teaching staff arrived back on Sunday evening and resumed duties on Monday morning.

Mrs. C. W. Barton, who visited her daughter, Mrs. Alex Campbell, for 10 days, returned Sunday morning.

Mr. and Mrs. H. Ford and family, of Lawson, Sask., arrived last week and will work the E. O. Hocart farm, vacated by R. Stewart.

Miss Bessie Seeger, who has been attending school at Atley spent the Easter vacation with her parents, Mr. and Mrs. Paul Seeger, Kimbundy.

The first of the series of Saturday night dances, under the patronage of the Chinook orchestra, will be held on Saturday night with the fun commencing at 9 o'clock.

Mrs. Harry Howton, who visited her daughter, Mrs. McGuffen, of Carstairs, and for some weeks has been taking medical treatment in Calgary, returned on Sunday morning.

Mrs. W. S. Lee and little son who accompanied her mother, Mrs. March, to Normal, Ill., a month ago, returned on Saturday morning. They visited with relatives in Winnipeg on their return.

Don't forget that the Sunday School will start next Sunday at 11 o'clock sharp, and the preaching service of the United Church will be held at 12 o'clock, immediately after the Sunday School.

The May meeting of the Women's Institute will be held at the home of Mrs. C. W. Rideout on Wednesday, May 7, at 3.15. Mrs. W. Aldigan being joint hostess with Mrs. Rideout. Roll call—exchange of apron patterns.

The Ladies' Card Club met on Tuesday evening at the home of Mrs. J. A. Rennie. The prize, a lovely pearl-on-amber photo frame, was won by Mrs. E. E. Jacques. The Club will meet next week at the home of Mrs. W. A. Todd.

Deputy Provincial Secretary.

Collholme Collections

Miss J. G. Morrison, R.N., spent the week end with friends in Hanna.

Mr. and Mrs. W. W. Wilson and family spent Sunday at the home of Mr. and Mrs. F. Hobson.

Mrs. John Duncan received the sad news of the death of her brother in law, who died very suddenly at her home in Scotland.

W. W. Wilson is hard at work with his yellow John Deere seedling and discing. He expects to do all the farm work this year with the tractor.

Miss D. G. Thomas, teacher of the Collholme school, returned on Sunday from her home in Okotoks, where she spent her Easter holidays.

Estelle D. MacKinnon celebrated her fifteenth birthday on Sunday last. Guests present were the Morrison family and John D. MacKinnon.

Ewart Duncan, who has been spending his Easter holidays at home, returned to Calgary on Sunday morning. The school term ends in May, and will not open again until the fall.

The district received a very welcome and refreshing rain on Friday, April 25. It started late Thursday evening and continued until late Friday morning. The moisture went down well below the seed, and very soon this seed will be well on its way to sunlight. J. W. Shier has a very nice stand of wheat, the first he seeded.

Heathdale Happenings

The Belgian stallion, Roy D'or owned by Dr. C. Head and clubbed for 1930 by Collholme Horse Breeders' Club, arrived in the district and started on the route on May 1.

At a regular meeting of the Collholme U.F.A., held in Clover Leaf school on Saturday, April 26, it was decided to hold a U.F.A. rally at Forkner's grove, north half of 19-27-7, on Sunday, June 15. All neighboring locals are invited to attend. A resolution regarding the discrimination of the Canadian Farm Loan Board in this district was forwarded to the Cereal convention. The following delegates were chosen to represent this local at the nominating convention, to be held at Cereal on May 31: N. D. Stewart, N. D. Morrison, E. J. Ellis and A. Carlson.

Goose Lake Ball League

The following is where the first six games will be played and the teams participating:

May 28—Oyen at Cereal, Chinook at Youngstown.

June 4—Youngstown at Oyen, Cereal at Chinook.

June 11—Youngstown at Cereal, Oyen at Chinook.

June 18—Chinook at Oyen, Cereal at Youngstown.

June 25—Youngstown at Chinook, Cereal at Oyen.

July 9—Chinook at Cereal, Oyen at Youngstown.

News in Brief

The Communist Party of Canada will contest five seats in the coming provincial elections—Calgary, Edmonton, Drumheller, Red Deer and Rocky Mountain House.

A golf match was played in England recently between an aviator and a professional, the latter dropping balls on the greens while the golfer played on terra firma. The birdman won, being required only to hit the green.

John A. Jaffary, 71, provincial librarian and archivist since 1921 died in Edmonton on Monday. He came west from Ontario in 1886 to British Columbia and was the first Presbyterian minister to reside in the Okanagan Valley.

According to the Calgary Herald the Southern Alberta road are in a bad condition. The McLeod trail, south of High River, is in an impassible state and a detour has to be made on the Buff road, one mile west of Cochrane.

Constable W. Shaw, of the Alberta Provincial Police, stationed at Youngstown, left on April 19 for Cochrane, where he will reside in the future, in the service of the A.P.P. The Youngstown post has been taken over by Constable T. Lees, of Bashaw.

Alma Young, the two-year-old daughter of Cecil Young, of Lonebutte, near Hanna, died on Thursday afternoon of last week, as the result of swallowing a gopher poison. Two other children were also sickened with the poison but will recover. The children found the liquid in the barn.

Fred Betts, of the Sheerness district, is the owner of a most valuable Holstein cow, which has recently presented him with the second set of twin calves since last May. In May of 1929 following the memorable storm of that month, this cow gave birth to twins, one of each sex. On March 14 last she duplicated her performance, all four calves being fine lusty youngsters. This famous Holstein is but six years old when she first came into possession of Mr. Betts who was rescued from starvation on the open range, having been lost by her owner, who had sold out and left the country. Mr. Betts brought the animal home and nursed her through to health on a diet of boiled oats. The owner a friend of the Betts family, was notified of the condition of his animal, but turned her over to Fred as a present, in consideration for his humane treatment. Now "Spot" is also doing her bit for her owners.—Hanna Herald.

Links with a Great Past

THE Hon. Barnaby Howard, little son of Lord Strathcona and descendant of the great Canadian who was one of the founders of the Canadian Pacific Railway, is here shown embracing the small daughter of the Hon. Mrs. Arthur Howard in Hyde Park, London, England. Both children are living links with the great past when one of the major events in the history of Canada was in the making.
